

THE ROYAL GANGES

THE RIVER AND YOU

The Ganges

In the late 17th century, the three villages that predated Calcutta were ruled by the Nawab of Bengal under Mughal suzerainty. After the Nawab granted the East India Company a trading licence in 1690, the area was developed by the Company into an increasingly fortified trading post known as Fort William.

Job Charnock, an English administrator with the East India Company found a cluster of prosperous villages along the Ganges that he thought would help in setting up trade for the British East India Company. This landing by the river by Charnock would forever change the history of the city and the entire country thereafter.

The Ganges has been revered and worshipped since long. The clay from the river bank is used to create idols of deities and they are immersed in the same river after worship. Its water is sprinkled in holy ceremonies. Rituals like Chhat puja to a holy dip during Diwali take place here. From a new-born's Sanatani baptism to the end of a life; the Ganges is a silent spectator.

Today, in these changing times, we welcome you to witness another event by the same river that is set to change the riverfront and usher in a new development of the area and surroundings for ever.

A magnum opus of over 39 lakh square feet of development that will consist of ultra-luxury bungalows, sophisticated and modern villaments and sky touching towers where all apartments will be facing the Ganges.

The plot has a frontage over 1 kilometre beside the Ganges and over 60 BUNGALOWS, over 150 VILLAMENTS and 22 TOWERS will be directly facing the river.

Leaf through these pages and discover golden ripples that make up a new history when it comes to almost owning the waterfront.

THE ROYAL GANGES

THE RIVER AND YOU

THE RIVER

Living in an almost pollution-free place in a metro city today is almost impossible. Which is why, living at THE ROYAL GANGES would challenge this belief by presenting an unbelievable 'living by the river' experience.

LIVING

River-facing homes just by the Ganges would redefine serene yet luxurious living where a neverbefore private track of over 1 kilometre by the Ganges, possibly the longest river frontage ever, will facilitate regular activities like daily walk, jogging, yoga, cycling and picnic. All these will make you a part of the river as the river becomes a part of you.

WHAT YOU GET

This lifestyle project, THE ROYAL GANGES, will have future-ready amenities and facilities that will touch every sensibility of the residents. From a football ground to tennis court, cricket simulator to badminton courts, amphitheatre to rock climbing walls, and a retail arena with daily provision stores, restaurants, ATM, salon, wine store, bar, chemist store etc plus a Ganges view deck and a grand landscaped lawn that will merge with the river.

THE CLUB

Indoor facilities at the 70,000 sqft Club begin with an Olympic-size swimming pool with Jacuzzi and Aqua gym to lavish five-star lounges and indoor sporting arenas. These and many more such will brighten the lives of the residents.

WHERE

Just a 20-minute drive from New Alipore, over the Sampriti flyover. It will have a private jetty and fast ferry service to and from The Millennium Park, that will take about 35 minutes, making commuting to the CBD area a dream. It will also have regular pick up and drop facility till Batanagar More. There will also be a private shuttle service till Taratala Metro station.

Proximity

CONNECTIVITY

- Akra Railway Station 2.2 kms
- Nangi Railway Station 2.6 kms
- Auto and Taxi Stand coming up THE ROYAL GANGES
- In-house transport service to and from Taratala Metro
- In-house transport service to and from Bata More
- In-house water transport to and from Millennium Park (35 minutes approximately)

DEPARTMENT STORES

- Department store, Restaurant, Bar, Salon and more coming up at THE ROYAL GANGES
- Easy Day Club Calcutta Riverside
- MORE 3.3 kms
- Highland New Market Calcutta Riverside main gate
- Spencer's 4.8 kms

SUPERMARKETS

- Esplanade Calcutta Riverside
- Retail facility THE ROYAL GANGES

ENTERTAINMENT & MALLS

- Upcoming Phoenix Mall 15 kms
- Lake Mall 17.3 kms
- South City Mall 18.3 kms
- Proposed Shopping Mall in Calcutta Riverside

HOSPITALS

- Kasturi Das Memorial Super Speciality Hospital 5 kms
- Gems Hospital & Medical Research Institute 5.8 kms
- Narayan Memorial Hospital 14 kms
- BP Poddar Hospital 4 kms
- The Calcutta Medical Research Institute CK Birla 15 kms
- Woodlands Hospital 16 kms

HEALTHCARE

- Upcoming Apollo Institute of Medical Sciences & Research Calcutta Riverside
- 24 x 7 Doctors on call, medicine shop, diagnostic centre, medical emergency set-up THE ROYAL GANGES

COLLEGES

- Techno International 4.4 kms
- George College of Management & Science 5.1 kms
- Maheshtala College 5.7 kms

Indian Green Building Council features

Green buildings or properties can have tremendous benefits, both tangible and intangible. The most tangible benefits are the reduction in water and energy consumption right from the first day of occupancy. The energy savings could range from 20 to 30 % and water savings around 30 to 50%. Intangible benefits of green building include enhanced air quality, excellent day light, health and wellbeing of residents, safety benefits and conservation of natural resources.

Rainwater harvesting

A rainwater harvesting tank installed at THE ROYAL GANGES would collect the rainwater from the roof and ground floor areas and store them to reuse it for gardening and landscaping. This will not only charge and enhance groundwater levels and reduce water flow into drains but also reduce the potable water required for the project, thereby making it water efficient.

Rainwater collection

Solar powered lights in common areas

Solar power lighting for common areas

THE ROYAL GANGES will have solar panels. The energy generated from them will be able to cater to 1% of the electrical power load for the common areas of the project to make it energy efficient.

Virgin greens

The site will be restored to virgin greenlands by adequate landscaping that will offer residents ample space for relaxation and play.

Waste and garbage disposal

THE ROYAL GANGES will recycle the waste water and reuse it for flushing in order to reduce the usage of potable water. The organic waste converter at THE ROYAL GANGES will help manage waste in a proper way and convert the kitchen and garden waste to manure and use it for the landscaping.

Limiting water waste

Low water flow fixtures specifically designed to limit water waste will help residents reduce water consumption.

Electric vehicle charging points

With rising fuel prices there is and will be a propensity to shift to renewable resources for vehicles. Which is why, the usage of electric vehicles are on the rise. A platinum rated property will have to have electric vehicle charging points to provide residents the provisions to charge electric vehicles at an extra cost.

Electric vehicle charging point

GH platinum pre-certified

Energy efficient lights in common areas

LED lights that consume almost 30% less electricity in comparison to other lights will help THE ROYAL GANGES reduce the energy consumption for the units making them energy efficient.

LED lights in indoor common areas

Adequate light and fresh air

THE ROYAL GANGES will have windows that are adequately sized to allow a lot of daylight and fresh air. Better indoor environmental quality will protect health, improve the quality of life, and reduce stress. In a way, it will also escalate the resale value of the property.

Ample daylight through large windows

Benefits of Sun path and Wind analysis.

Orientation of THE ROYAL GANGES buildings in relation to the sun's path as well as wind direction will increase the energy efficiency of the TOWERS, making them less expensive and more comfortable to live.

Buildings at THE ROYAL GANGES will get adequate daylight, air and shade with adequate shades in the outdoor areas during the day round the year. This will ensure a better environment for residents.

Constructed to bring in natural sunlight and ventilation into the interior spaces will benefit residents by helping them save energy and will ensure healthier living spaces.

River bank protection

THE ROYAL GANGES needs to be protected, by the owner, Srijan Realty or the residents. Kolkata Port Trust (KOPT) has incorporated a rule with regards to amenities or any infrastructure to be developed at the bank of River Hooghly: an implementation of river bank protection, which is essential for protection of that infrastructure.

Kolkata Port Trust (KOPT) has incorporated the above rule considering basic science, such that due to change in the river course the bank of the river will not get eroded. In THE ROYAL GANGES, Srijan Realty has implemented the riverbank protection, by obeying the rule of KOPT. Riverbank protection is essential to ensure that no adverse effect will ever come on the river hydrodynamics and the riverbank. Srijan Realty has approached the concerned expert from Jadavpur University and two other expert consultants of Calcutta to have a scientific riverbank protection for the present project.

As per rule of KOPT, no surcharge load should come along the 11 metre width from the riverbank, which has been incorporated in the project planning. This riverbank protection, following the KOPT rules is even more essential now in the era of climate change. By following this rule the society can get a space to breath freely at the bank of the river without any fear or worry, and a space to develop a green belt becomes available.

The river bank has been protected using a soft solution approach in contrast to hard engineering measures usually undertaken in such work. Soft engineering is nature-friendly with a lower environmental and energy footprint. Yet, it provides a very long term PAR management solution against erosive forces in the river.

The geo-synthetic solution used, allows growth of naturally occurring species of vegetation providing an aesthetically pleasing view of the property from the river.

24 x 7 ambulance service.

Shuttle service to and from Batanagar More and Taratala Metro Station.

24 x 7 Medicine store.

Consultants

Landscape

The landscape design by Tectonix Limited, Thailand will feature the interpretation of the river's elements created from the organic shape of water movement. Meticulous details will be applied to floor patterns, vertical elements, and functional areas. Signature design elements will be seamlessly integrated to the openness of the sky and the river.

Architecture

Principal architect, Subir Kumar Basu feels that there are many sites that have only a part touching the river bank. This one is an exception where the entire site is along the river ... which is why, they have taken full advantage of this.

They have distributed physical and visual access to the river and the river breeze equally amongst all types of development in the site.

There is a hierarchy of height in the placement of buildings, the lowest blocks are closest to the river and the tallest ones further back. This will allow all units to enjoy the proximity of the river. All the units, including all the apartments will have a very wide view of the Ganges from their units. This is unique and may not be matched with any other project in the city.

In the very near future he expects THE ROYAL GANGES to become an icon of the city and a high benchmark in terms of things to come in the locality. It has the potential to become the first Marina Township of the city, he feels.

Structure

Utpal Santra, director, MN Consultants Private Limited and Principal Structural Engineer of the project found a number of things to be taken care of ... protecting the abutting river bank from erosion and strong winds due to the open spaces in front.

Keeping in mind the building movements in high wind conditions, the comfort level of residents were simulated and taken care of. Apart from the above, the structural design has carefully handled in sync with the architectural design idea. The viewing deck from the apartments will be obstruction-free. There will be no column in the front. The structural designs are very robust and strong as well as sleek. The state of the art technology with latest software has been used while analysing and designing the structures.

The residential units are designed in a way that they are river facing ... especially the rooms with balconies. All of this has been achieved even after keeping sufficient open spaces and landscaping in-between the blocks.

Interiors & Facade

Interiors architect and designer Kapil Bhalla of SEARCH feels that it is the serenity that is essential to the project. They have been able to enhance the experience at the ground level so that the focus would remain on the waterfront and people of all ages will have some thing that they engage and associate with. The living units will be optimised so that a resident gets to use more carpet area functionally. He is confident that the project will become a much sought after location to live, work and play.
